Your Intelligent POS Solution: User-Friendly with Expert Analysis

The Best-Run Businesses Run SAP™

Central Overview of Sales Data

Central Overview of Sales Data

Cash and card payments, transactions and invoicing: POS systems need to be versatile and to simplify workflows. Direct connections to inventory control systems offer extra benefits, such as detailed real-time analyses.

When an item arrives, it can go on sale immediately. In the fast-moving retail sector, planning for purchasing must be precise to prevent bottlenecks. Real-time IT systems that combine information from outlets with your supply chain management make this possible. You can evaluate your data at any time and know exactly how much to order and which products are particularly profitable.

Many companies use SAP® Customer Checkout, based on the SAP Business One ERP system, to control their POS system. The solutions set standards of flexibility and functionality. They cover all basic functions and also permit ad-hoc analyses.

SAP Customer Checkout covers all basic functions and also permits ad-hoc analyses.

Simplifying Sales

Flexible - Around the World

Simplifying Sales

SAP Customer Checkout gives your sales staff all the information they need. Customers can pay in cash, with standard EC and credit cards or vouchers – either at stationary cash registers or via staff members' hand-held tablet PCs. Special offers like discounts, loyalty cards and apps are easy to integrate in your Point of Sale application.

You can also personalize your sales system. The solution recognizes regular customers by their customer number or by scanning a QR code directly on smartphones or tablets. You can print receipts as usual, with any type of printer.

At wrap-up time, the solution produces a detailed overview of the balance of cash, card payments and vouchers. Potential differences are easy to detect, investigate and trace.

SAP Customer Checkout helps you with:

- Merchandise sales and returns
- Cashing up and daily accounts
- Discount and voucher management
- Payment with cash, cards and vouchers
- Integration of customer orders (down payments, invoices)
- Loyalty management

Simplifying Sales

Flexible - Around the World

SAP Customer Checkout can be installed on all standard cash register infrastructures. The solution is optimized for use with SAP ERP systems, for example SAP Business One.

You have access to the data, anytime and anywhere. Even if your Internet connection goes down, your employees can continue working normally. The invoice data is saved and sent to the ERP system as soon as the connection is available again.

The software is available in different country and language versions.

Your benefits:

- Simple installation
- Automatic updates
- Supplementary plug-ins for special requirements

You have access to the data, anytime and anywhere. Even if your Internet connection goes down, your employees can continue working normally.

One Click from the POS to the ERP system

One Click from the POS to the ERP system

SAP Customer Checkout can be used as a standalone solution. However, its special advantages really come into play when combined with the SAP Business One ERP system. This pools all of your information in one location. When products or prices change, outlets can be notified immediately.

Real-time reporting

Transactions are transmitted directly to warehouse management and accounting. How much revenue did a specific event, product or an individual customer generate? Your employees can find out with just a few clicks. For example, this helps you boost sales with targeted measures. You can analyze the data on the same day.

Challenges

Summary

SAP Customer Checkout covers all Point of Sale requirements, from sales to discount campaigns. The latest sales figures are always available for detailed analyses, reports and forecasts. Based on detailed customer data, you can boost your sales with targeted measures.

Challenges

- Detailed analysis of sales figures
- Simplifying payments
- Facilitating all payment methods

Solution

Key benefits

At a glance

Solution

- Link cash register data with the ERP system
- Create lean and user-friendly processes
- Automatic maintenance and updates

Key benefits

- Analyze point of sale data in real time
- Generate up-to-minute reports at the push of a button
- Benefit from minimal implementation and operating costs
- Use multi- and omni-channel retailing
